

Info Letter and Consent Form

Welcome to the Backyard Bird Project participant survey.

This survey asks about your backyard bird feeding and/or poultry practices, your perceptions of avian disease risk, and your conservation-related attitudes and behaviors. It takes about 10–15 minutes. Your participation is voluntary. You may skip any question or stop at any time. Your responses are kept confidential. If you take part in our Backyard Birds field study, your responses are labeled with your household's site code rather than your name, and the list linking codes to households is stored separately and securely, so your identity is not attached to your answers. If you are not part of the field study, your responses are anonymous.
